

Biomechanics & Injury

Delta-V Experts (DVE) offers a complete biomechanics, injury and ergonomics expert capability. Through an extensive research and knowledge base, DVE staff can provide Expert Opinion on injury circumstances, based on recorded injuries, the surrounding circumstances and the principles of biomechanics and other methods.

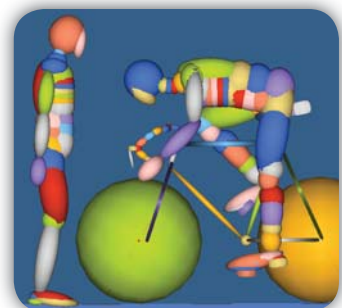

Computer Models of impacts, masses and movements can also be developed to simulate scenarios and the feasibility (or otherwise) of a reported injury. Similarly, Physical Testing can be carried out to determine injury potential for various impact configurations. The results are combined with statistical biomechanics to determine the likelihood of injury occurrence.

Professional Ergonomic Assessments of workplaces, workstations, equipment and work methods can be made to ensure compliance with standards and reduce risk of injury to workers.

Benefits

DVE's findings are provided to clients in clear, concise, substantiated reports, suitable for use in legal cases. DVE personnel have proven court experience and are always available to be called on as expert witnesses.

DVE investigations provide clients with a reliable and full understanding of the surrounding circumstances, providing you with an informed position to decide your options.

Biomechanics & Injury

Applications

DVE's Biomechanics & Injury services are regularly used for many different purposes, including:

- » Personal injury claims (traffic and workcover)
- » Insurance claims
- » Product liability cases
- » Coronial Inquests
- » Criminal cases (workcover prosecutions)
- » Ergonomic assessments

Our services are used extensively by the legal, insurance, transport and manufacturing industries.

Contact Us

Please contact us to arrange a more detailed presentation of these services and allow us to demonstrate the major benefits to be gained by using DVE's Biomechanics services and Ergonomic Assessments.
