

Incident Investigation & Reconstruction

Delta-V Experts (DVE) is a specialist forensic engineering and safety solutions company. DVE conducts in-depth, scientific and reliable investigations into incidents to determine the true causes of failure and any contributing factors. The types of incidents we investigate include transport accidents, workplace injuries, and equipment failures.

We start by obtaining as much information as possible about the case; this can include Police briefs, photographs, witness statements, medical records, correspondence and many other sources as relevant. The information is carefully reviewed and, where necessary, research is conducted to support any of the potential findings.

DVE also provides a full Site Inspection and Recording service, where an incident scene is accurately measured for the creation of scale reconstruction diagrams. Our forensic engineers are trained to inspect and document any vehicles, machinery or equipment involved to record key physical evidence. DVE provides a 24 hour response number, **1300 DELTAV**, and an emergency callout service to attend scenes anytime, anywhere, worldwide. Fully Licensed Inquiry Agents are on staff, to assist with locating and interviewing any witnesses or relevant parties if required.

Another of DVE's key capabilities is Physical Testing and Computer Modelling. Our highly qualified staff have conducted numerous full scale, dynamic impact and crash tests. Such testing can make a major difference in determining incident circumstances, compared with just a desktop analysis.

DVE's findings are provided to clients in clear, concise, substantiated reports, suitable for use in legal cases. DVE personnel have proven court experience and are always available to be called on as expert witnesses.

Incident Investigation & Reconstruction

DVE investigations provide clients with a reliable and full understanding of the surrounding circumstances, providing you with an informed position to decide your options.

Applications

DVE's Incident Investigation & Reconstruction services are regularly used for many different purposes, including:

- » Personal injury claims (traffic and workplace)
- » Insurance claims
- » Product liability cases
- » Coronial Inquests
- » Criminal cases (Culpable/Dangerous Driving/Workplace)
- » Major incidents

Our services are used extensively by the legal, transport, insurance and mining industries, as well as government and road authorities.
