

Vehicle & Fleet Services

Delta-V Experts (DVE) is a specialist forensic engineering and safety solutions company. We have a long history of evaluating vehicle dynamic performance for fleet operators. DVE provides state-of-the-art scientific vehicle handling testing and evaluations to provide improved vehicle selection and specification, reduced crash risk and improved safety.

A specific vehicle purchase and/or classification will define the Safety outcomes for the operators of those vehicles and the organisations. DVE's Vehicle & Fleet Services enable organisations to make informed Vehicle & Fleet decisions.

All vehicles have different levels of handling and stability, and their loading configuration affects their safety and crash risk. DVE uses state-of-the-art technology and has developed advanced testing methods to determine vehicle handling characteristics and assess fitness for purpose.

Vehicle Handling Testing can be applied to all vehicle types, situations and applications. This includes vehicles used in off-road or hazardous conditions, or carrying unusually placed or heavy equipment, or where the loading configuration has been modified. DVE provides quantified handling evaluations, eliminating subjective, opinion-based appraisals.

Our knowledge base of test reports can also assist with Fleet Selection Advice, ensuring that the appropriate vehicle is selected given operational, OH&S and other requirements.

Benefits

DVE's findings are provided to clients in clear, concise, substantiated reports. Full vehicle handling assessments provide peace of mind and certainty of compliance with OH&S requirements.

Fleet managers use this data to make informed decisions about vehicle purchases and fit outs to reduce collision risk and improve safety for the entire fleet.

Vehicle & Fleet Services

Applications

Vehicle assessments have been conducted for energy companies, police forces, postal delivery companies and other major organisations, as well as component manufacturers and distributors. These companies have benefited from significantly reduced risk exposure. Any major fleet operator can gain from the level of due-diligence that only a DVE handling and fleet assessment can provide.

DVE's consultancy service provides a rapid turnaround on the suitability and applicability of vehicles for use in remote and hazardous locations. The assessment can be carried out based on suitable imagery and descriptions. The service is focused on operational safety systems, Rollover Protective Structural System, seats, seatbelts, entry and egress, vehicle procurement recommendations and other factors.

Contact Us

Please contact us to arrange a more detailed presentation of these services and allow us to demonstrate the major benefits to be gained by using DVE vehicle handling assessments to help improve your operations and safety.
